PROFESSIONAL SUMMARY

Passionate Frontend Developer with practical, hands-on experience building responsive, component-driven web applications using React.js, Tailwind CSS, and JavaScript (ES6+). Proven ability to integrate third-party REST APIs, implement dynamic routing, and deploy production-ready projects — demonstrated through three fully functional, live applications. Highly motivated to contribute to a collaborative development team, learn from experienced engineers, and create impactful user experiences from day one.

TECHNICAL SKILLS

Core: HTML5 · CSS3 · JavaScript ES6+

Frameworks: React.js · Tailwind CSS · Bootstrap 5

React Ecosystem: React Router DOM · React Hooks · Component Architecture · Axios

CSS Concepts: Flexbox · CSS Grid · Responsive Design · Mobile-First

APIs & Tools: REST APIs (TMDB, OpenWeatherMap) · Fetch API · Git & GitHub · GitHub Pages · VS Code

PROJECTS

Live Weather Dashboard | *React.js · OpenWeatherMap API · Fetch API · Tailwind CSS*

github.com/sakshishahss/live-weather-dashboard

- ▶ Built a real-time weather dashboard by integrating the **OpenWeatherMap REST API** using the native **Fetch API** — fetching and displaying live weather data including temperature, humidity, wind speed, and conditions for any searched city.
- ▶ Implemented a clean, responsive UI with **Tailwind CSS** featuring dynamic weather condition rendering, smooth search interactions, and **mobile-first** layout design.
- ▶ Managed async API calls and **React state** (useState, useEffect) to update the UI in real time without page reloads, reinforcing strong understanding of data flow in **React.js**.

Movie App | *React.js · TMDB API · React Router DOM · Axios · Tailwind CSS*

github.com/sakshishahss/Movie-App

- ▶ Built a dynamic, data-driven movie browsing app by integrating the **TMDB REST API** via **Axios** — fetching and rendering live trending and popular movie data.
- ▶ Implemented multi-page navigation using **React Router DOM**, enabling seamless client-side routing between Home, Popular, and Movie Detail views without page reloads.
- ▶ Crafted a polished, interactive UI with **Tailwind CSS** — including responsive grid layouts, hover animations, and smooth transitions for an engaging user experience.

Personal Portfolio Website | *React.js · Tailwind CSS · Component Architecture · GitHub Pages*

github.com/sakshishahss/My-Portfolio

- ▶ Built a personal portfolio using **React.js**, structured into 7 reusable components (Navbar, Hero, About, Skills, Projects, Contact, Footer) for a clean, modular codebase.
- ▶ Styled with **Tailwind CSS** utility classes including responsive breakpoints (**md:flex-row**) to ensure the layout adapts correctly across mobile and desktop screen sizes.
- ▶ Deployed the live site on **GitHub Pages** using **Vite**, handling the complete workflow from local development to production deployment independently.

WHAT I BRING TO A TEAM

- ▶ Production-ready code habits — All three projects are live, structured, and maintainable — not just academic exercises.

- ▶ Mobile-first mindset — Every UI I build is designed responsive from the ground up using Tailwind CSS, not retrofitted.
- ▶ API integration experience — Hands-on with REST APIs (TMDB, OpenWeatherMap) using both Fetch API and Axios, with async data handling in real applications.
- ▶ Fast, self-driven learner — Independently built and shipped full applications — ready to ramp up quickly on any stack.

EDUCATION

Master of Business Administration (M.B.A)

L.J. College, Ahmedabad · CGPA: 8.33 · 2022

Relevant coursework: Data Structures · Problem Solving · Computer Basics

SOFT SKILLS & LANGUAGES

Soft Skills: Quick learner · Attention to detail · Team player · Problem solving · Adaptability · Communication

Languages: English — Professional Proficiency · Hindi & Gujarati — Native
